Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This office action is responsive to application filed on 12/31/2003. Claims 1-27 are pending

RESTRICTION ELECTION

A telephone call was failed to connect to Mike Skrehot on 11/30/2005 and this restriction/election is required as follow.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-21, draw to dividing the total decoupling capacitance value for that lead category in that region by the number of the decoupling capacitors allocated for that lead category in that region to obtain a desired individual capacitance value for each of the decoupling capacitors allocated for that lead category in that region, classifiable in class 716 subclass 7.

Group II. Claims 22-27, draw to a second group of the decoupling capacitors electrically connected to a second select group of the chip leads in the first select region of the chip leads, the second group of decoupling capacitors each having a second decoupling capacitance and each having a second self-resonance frequency, wherein the second decoupling capacitance differs from the first decoupling capacitance, and wherein the second self-resonance frequency differs from the first self-resonance frequency, classifiable in class 716 subclass 1.

The invention group I has dividing the total decoupling capacitance value for that lead category in that region. The invention group II uses the second decoupling capacitance differs from the first decoupling capacitance. See M.P.E.P. § 806.05(c).

The inventions are distinct, each from the other because of the following reasons:

a. These inventions have acquired a separate's status in the art as shown by their different classification and the invention group II does not require routing resource as recited in the invention group I.

- b. The search required for one Group is not required for the other Groups.
For the reasons above restriction for examination purposes as indicated is proper.

The applicant is requested to cancel the claims of non-selected group.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
